

CM 4H

Complementary machines

Milling machine dedicated to machining the contour of PVC and PVC-aluminium profiles pre-cut to 45°. The machine can perform 2 types of machining operations: contouring of Seamless® welding profiles and milling of PVC and aluminium hybrid profiles for welding with universal machines. CM 4H was designed to be combined with the SM 4H so that a single operator can work in parallel with the welding and milling machine, optimising production processes. It is possible to equip the milling units (2 by 2) with different tools. This allows the simultaneous handling of PVC and/or mixed material profiles (PVC-Alu).

- ELECTROSPINDLE MOTOR POWER 2 KW
- AVERAGE CYCLE TIME FOR 4 WORKPIECES 75 SEC.
- PRESETTING FOR SWARF EXHAUSTER SYSTEM CONNECTION
- ADJUSTABLE 15.6" TOUCHSCREEN DISPLAY
- USER-FRIENDLY AND EASY TO PROGRAM HMI
