

GLS 192 B

Complementary machines

Pneumatic V-cutting saw for 2x45° angle cutting, equipped with special blades arranged one above the other for simultaneous undercutting of the glazing bead web. The machine is equipped as standard with pneumatic, vertical special clamping device which enables the simultaneous processing of glazing beads.

Options:

- Roller conveyor with stand
- Stop and measuring systems
- Profile counterblocks
- Blades

Snap-in interchangeable counterblocks

The counterblocks are very easy to change: a snap-in mechanism enables them to be changed without having to use any other tools.

Workpiece clamping system

The workpiece is clamped from above by means of clamps; thin profiles can also be clamped by GLS 192 from the bottom to avoid the risk of deformation and to ensure a greater cutting precision.

Cutting module

Glass stopper cuts are made by 2 cutting units, one set at 45° and the other at 135°. Each cutting unit is made up of 2 blades: the first actually cuts the glass stopper and the second, which has a smaller diameter, makes the cut in the glass stopper that is to house the gasket. This machine configuration enables 2 profiles to be inserted in the counterblocks so that 2 glass stoppers can be cut at the same time.

Connection to roller conveyors and stop gauges

Beside the cutting area there is a steel support for connecting the machine to an infeed roller conveyor or a stop gauge that ensures high positioning precision while cutting the glass stopper.

LAYOUT

The overall dimensions may vary depending on the product configuration.

WORK AREA

| | |
|-----------------------------|------|
| Maximum cutting width (mm) | 130 |
| Maximum cutting height (mm) | 44,5 |
| Minimum profile length (mm) | 240 |

DIMENSION AND WEIGHT

| | |
|-------------|-------|
| Length (mm) | 460 |
| Depth (mm) | 1.040 |
